

Product Information

Front-Flush plinth cover VKB

This plinth blender ensures a front flush transition to the floor

Planning notes:

Application in all areas where typical plinth recesses can be ignored (i.g. run of tall units)

Installation instructions:

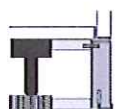

Screw connection of prepared fixing material on the plinth legs. The blender will be fixed by a tongue and groove connection.

Tip:

For lateral plinths please order ref. VKSB. (interesting in case of tall units with angled fronts at the end of a run)

See price and type list – page 61.02
